School Programs
Coding Made Fun

The Hatch-vantage:

> Extra and co-curricular programs to meet your school's needs

> Sessions offered during the school day, at lunch or after school

> Available to girls & boys aged 7 and older

> No prior coding experience required

> Project themes (art, sports, science, etc.) to engage students

> Experienced instructors with vulnerable sector checks

> Projects stored in a digital portfolio on a secure server

> Option for schools to use your own or rent our laptops

"Hatch was one of our largest after school programs ever. Results and feedback were very positive and we immediately started enrolment for their [next] program."

Upper Canada College

Hatch provides students with the ability to learn 21st century skills through student-centered, self-paced, mastery-based learning programs in which students tackle coding problems while having fun.

HatchCanada.com

"After researching and interviewing several coding education providers, the program Hatch Canada was able to offer was by the most impressive ... the positive feedback from both the parents and students themselves continued to escalate and we hope to offer Hatch Canada's coding education to our children for the duration of their elementary school years."

John Fisher Public School
Toronto District School Board
